

Spirituality within Science

Spirituality within Science at Cop Lane C.E. Primary School

Spirituality can be observed throughout the teaching and learning of Science at Cop Lane C.E. Primary School as our children explore and become curious about the natural world. Science provides a space for our children to marvel at the wonders of the universe, fostering a sense of awe and respect for the intricacies of life. The curriculum allows children to investigate and explore the world around them and, through hands-on experiments and observations, our children develop an appreciation for the beauty of nature and interconnectedness of living things. Additionally, scientific enquiry encourages a mindset of questioning and discovery, allowing children to ponder profound questions about existence and the mysteries of the universe. With this learning, children are more able to reflect on their role within the world community and form their own thoughts and opinions about their beliefs.
