Class novel/daily reading

English

The Lion, The Witch and the Wardrobe LPDS bridging unit.

This publication of 7-8 weeks focusing on Year 4 and Year 5 reading and writing skills, includes both narrative and non-fiction opportunities, all based around the classic children's novel The Lion, The Witch and The Wardrobe. Using film clips, websites and a range of texts, including those themed around evacuation and muthical creatures, this unit will immerse the children in themes central to the novel. A variety of short and long writing opportunities are embedded throughout the unit as the children analyse the story, gather content on mythological creatures and develop an extended narrative based upon The Lion, The Witch and The Wardrobe.

Novel as a Theme/ Historical narrative

Create and punctuate complex sentences using ed opening clauses e.g. Exhausted from the race, Sam collapsed in a heap.
Create and punctuate complex sentences using ing opening clauses, e.g. Grinning with anticipation, Paul launched himself from the diving board.

Reports including formal reports 2 weeks — 'Tuesday' by David Weiner, moon landings — outdoor learning — 'Tuesday' investigation. Use talk for writing —

Poems with figurative language linked to Space theme.

interviews/hot seating.

Older Literature 2 weeks — Charles Dickens - A Christmas Carol

Identify and use **dashes** to indicate

parenthesis, e.g. in less formal writing: The cake was lovely — delicious in fact — so I had another slice.

Link ideas across paragraphs using adverbials for time, place and numbers e.g. later, nearby, secondly.
Use organisation and presentational devices e.g. underlining, bullet points, headings.

headings.

Recognise and spell words ending in —able and —ible.

Recognise and spell words ending in —ably and —ibly.

Use expanded noun phrases to convey complicated information concisely, e.g.carnivorous predators with surprisingly weak jaws and small teeth.

Myths & Legends — Greek myths/legends Use talk for writing/story mapping. Leo and the Gorgon's Curse 6 weeks.

Classic narrative poetry 2

weeks — The Highway Man — opportunity for WOW starter — crime scene. Use talk for writing — learn poem.

Performing

solemn.

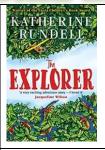

Use appropriate intonation and volume.
Add movement.
Ensure meaning is clear.
To spell further suffixes, e.g. *ll in full becoming l*.
Spell some words with 'silent' letters, e.g. *knight, psalm*,

Explore, collect and use modal verbs to indicate degrees of possibility e.g. might, could, shall, will, must.
Explore, collect and use adverbs to indicate degrees of possibility e.g. surely, perhaps, maybe, definitely, alternatively, certainly, probably.

Magazine articles – Greek food – DT link

Discussion — formal debate/Argument text/ Radio advert to move to Sparta or Athens - Athenians vs Spartans.

Recognise and spell words with the /i:/ sound spelt ei after c, e.g. deceive, receive. Use devices to build cohesion within a paragraph e.g. firstly, then, presently, this, subsequently.

Stories from other cultures/ Historical narrative — links to Mayan culture and folktales 2 weeks Film and Playscript - The Great Kapok Tree The Chocolate Tree Rainplayer

Novel as a Theme! Adventure - The Explorer by Katherine Rundell 6 weeks

Create complex sentences by using relative clauses with relative pronouns who, which, where, whose, when, that e.g. Sam, who had remembered his wellies, was first to jump in the river. The thief broke into the house which stood on the top of the hill.

Create complex sentences where the relative pronoun is omitted e.g. Tina, standing

at the bus stop, pondered the day ahead. Create and punctuate

sentences using simile starters, e.g. Like a fish out of water, she conversed awkwardly with the other guests. Novel as a Theme! Adventure - The Explorer by Katherine Rundell 6 weeks continued

Information booklet with range of text types — Amazon Rainforest/Maya.

Poems with structure (performance poetry) — Haiku

Investigate verb prefixes e.g. dis-, re-, pre-, mis-, over-.
To recognise and spell the

- Rainforest/Amazon themed

Performing

Use appropriate intonation and volume.

Add movement.

suffixes -al,- ary,- ic.

Ensure meaning is clear.

Use suffixes —ate, -ise, -ify to convert nouns and adjectives into verbs.

Investigate verb prefixes e.g. dis-, de-, re-, pre-, mis-, over-.

ongoing	Select the appropriate language and	. structures.		

writing skills

Use similar writing models.

Note and develop ideas.

Draw on reading and research.

Think how authors develop characters and settings (in books, films and performances).

Drafting and Writing

Select appropriate structure, vocabulary and grammar.

Evaluating and Editing

Assess the effectiveness of own and others' writing in relation to audience and purpose.

Suggest changes to grammar, vocabulary and punctuation to enhance effects and clarify meaning.

Ensure consistent and correct use of tense throughout a piece of writing.

Ensure consistent subject and verb agreement.

Proofread for spelling and punctuation errors.

To spell unstressed vowels in polysyllabic words.

Develop self-checking and proof reading strategies.

Spell words that they have not yet been taught by using what they have learnt about how spelling works in English.

Use the first three or four letters of a word to check spelling, meaning or both of these in a dictionary.

Use a thesaurus.

Spell words from the Year 5 list (selected from the statutory Year 5/6 word list).

Write fluently using a joined style as appropriate for independent writing.

Choose when it is appropriate to print (lower case or upper case) rather than to join writing e.g. printing for labelling a scientific diagram or data, filling in a form, writing an e mail address.

ongoing English

Handwriting

Pupils should be taught to:

- write legibly, fluently and with increasing speed by:
- choosing which shape of a letter to use when given choices and deciding whether or not to join specific letters
- choosing the writing implement that is best suited for a task.

Grammar

Pupils should be taught to:

develop their understanding of the concepts set out in English Appendix 2 by:

- recognising vocabulary and structures that are appropriate for formal speech and writing, including subjunctive forms
- · using passive verbs to affect the presentation of information in a sentence

Spelling

Pupils should be taught to:

- use further prefixes and suffixes and understand the guidance for adding them
- spell some words with 'silent' letters [e.q. knight, psalm, solemn]
- continue to distinguish between homophones and other words which are often confused

- using expanded noun phrases to convey complicated information concisely
- · using modal verbs or adverbs to indicate degrees of possibility
- · using relative clauses beginning with who, which, where, when, whose, that or with an implied (i.e. omitted) relative pronoun
- · learning the grammar for years 5 and 6 in English

Appendix 2 indicate grammatical and other features by:

- using commas to clarify meaning or avoid ambiguity in writing
- · using hyphens to avoid ambiguity
- · using brackets, dashes or commas to indicate parenthesis
- using semi-colons, colons or dashes to mark boundaries between independent clauses
- · using a colon to introduce a list
- punctuating bullet points consistently

use and understand the grammatical terminology in English Appendix 2 accurately and appropriately in discussing their writing and reading.

- use knowledge of morphology and etymology in spelling and understand that the spelling of some words needs to be learnt specifically, as listed in English Appendix 1
- use dictionaries to check the spelling and meaning of words
- use the first three or four letters of a word to check spelling, meaning or both of these in a dictionary
- use a thesaurus.

Mathematics

WHITE ROSE

Number: Place Value

Step 1 Roman numerals to 1,000

Step 2 Numbers to 10,000

Step 3 Numbers to 100,000

Step 4 Numbers to 1,000,000

Step 5 Read and write numbers to 1,000,000

Step 6 Powers of 10

Step 7 10/100/1,000/10,000/100,000 more or less

Step 8 Partition numbers to 1,000,000

Step 9 Number line to 1,000,000

Step 10 Compare and order numbers to 100,000

Step 11 Compare and order numbers to 1,000,000

Step 12 Round to the nearest 10, 100 or 1,000

Step 13 Round within 100,000

Step 14 Round within 1,000,000

NATIONAL CURRICULUM LINKS:

Read Roman numerals to 1,000 (M) and recognise years written in Roman numerals.

Read, write, order and compare numbers to at least 1,000,000 and determine the value of each digit.

Count forwards or backwards in steps of powers of 10 for any given number up to 1,000,000.

Solve number problems and practical problems involving the above.

Round any number up to 1,000,000 to the nearest 10, 100, 1,000, 10,000 and 100,000.

Number: Addition and Subtraction

Step 1 Mental strategies

WHITE ROSE

Number: Multiplication and Division B

Step 1 Multiply up to a 4-digit number by a 1-digit number

Step 2 Multiply a 2-digit number by a 2-digit number (area model)

Step 3 Multiply a 2-digit number by a 2-digit number

Step 4 Multiply a 3-digit number by a 2-digit number

Step 5 Multiply a 4-digit number by a 2-digit number

Step 6 Solve problems with multiplication

Step 7 Short division

Step 8 Divide a 4-digit number by a 1-digit number

Step 9 Divide with remainders

Step 10 Efficient division

Step 11 Solve problems with multiplication and division

NATIONAL CURRICULUM LINKS:

Multiply numbers up to four digits by a 1- or 2-digit number using a formal written method, including long multiplication for 2-digit numbers.

Divide up to four digits by a 1-digit number using the formal written method of short division and interpret remainders appropriately for the context.

Solve problems involving multiplication and division, including using their knowledge of factors and multiples, squares and cubes.

Number: Fractions B

Step 1 Multiply a unit fraction by an integer

Step 2 Multiply a non-unit fraction by an integer

Step 3 Multiply a mixed number by an integer

Step 4 Calculate a fraction of a quantity

Step 5 Fraction of an amount

Step 6 Find the whole

Step 7 Use fractions as operators

WHITE ROSE

Geometry: Shape

Step 1 Understand and use degrees

Step 2 Classify angles

Step 3 Estimate angles

Step 4 Measure angles up to 180°

Step 5 Draw lines and angles accurately

Step 6 Calculate angles around a point

Step 7 Calculate angles on a straight line

Step 8 Lengths and angles in shapes

Step 9 Regular and irregular polygons

Step 10 3-D shapes

NATIONAL CURRICULUM LINKS:

Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles.

Draw given angles, and measure them in degrees (°).

Identify angles at a point and 1 whole turn (total 360°).

Identify: angles at a point and 1 whole turn (total 360°); angles at a point on a straight line and half a turn (total 180°).

Use the properties of rectangles to deduce related facts and find missing lengths and angles.

Distinguish between regular and irregular polygons based on reasoning about equal sides and angles.

Identify 3-D shapes, including cubes and other cuboids, from 2-D representations.

Geometru: Position and Direction

Step 1 Read and plot coordinates

Step 2 Problem solving with coordinates

Step 3 Translation

Step 4 Translation with coordinates

Step 5 Lines of symmetry

Step 6 Reflection in horizontal and vertical lines

Step 2 Add whole numbers with more than four digits

Step 3 Subtract whole numbers with more than four digits

Step 4 Round to check answers

Step 5 Inverse operations (addition and subtraction)

Step 6 Multi-step addition and subtraction problems

Step 7 Compare calculations

Step 8 Find missing numbers

NATIONAL CURRICULUM LINKS:

Add and subtract numbers mentally with increasingly large numbers.

Add and subtract whole numbers with more than four digits, including using formal written methods (columnar addition and subtraction).

Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.

Round any number up to 1,000,000 to the nearest 10, 100, 1,000, 10,000 and 100,000.

Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy.

Number: Multiplication and Division A

Step 1 Multiples

Step 2 Common multiples

Step 3 Factors

Step 4 Common factors

Step 5 Prime numbers

Step 6 Square numbers

Step 7 Cube numbers

Step 8 Multiply by 10, 100 and 1,000

Step 9 Divide by 10, 100 and 1,000

Step 10 Multiples of 10, 100 and 1,000

NATIONAL CURRICULUM LINKS:

Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers.

Solve problems involving multiplication and division, including using their knowledge of factors and multiples, squares and cubes.

Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers.

Establish whether a number up to 100 is prime and recall prime numbers up to 19.

Recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3).

NATIONAL CURRICULUM LINKS:

Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.

Solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number (Y4)

Number: Decimals and Percentages

Step 1 Decimals up to 2 decimal places

Step 2 Equivalent fractions and decimals (tenths)

Step 3 Equivalent fractions and decimals (hundredths)

Step 4 Equivalent fractions and decimals

Step 5 Thousandths as fractions

Step 6 Thousandths as decimals

Step 7 Thousandths on a place value chart

Step 8 Order and compare decimals (same number of decimal places)

Step 9 Order and compare any decimals with up to 3 decimal places

Step 10 Round to the nearest whole number

Step 11 Round to 1 decimal place

Step12 Understand percentages

Step 13 Percentages as fractions

Step 14 Percentages as decimals

Step 15 Equivalent fractions, decimals and percentages

NATIONAL CURRICULUM LINKS:

Read, write, order and compare numbers with up to 3 decimal places.

Read and write decimal numbers as fractions.

Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths.

Solve problems which require knowing percentage and decimal equivalents of 1/2 , 1/4 , 1/5 , 2/5 , 4/5 and those fractions with a denominator of a multiple of 10 or 25.

Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents.

Solve problems involving numbers up to 3 decimal places.

Round decimals with 2 decimal places to the nearest whole number and to 1 decimal place.

Recognise the per cent symbol (%) and understand that per cent relates to "number of parts per 100", and write percentages as a fraction with denominator 100, and as a decimal fraction.

Measurement: Perimeter and Area

NATIONAL CURRICULUM LINKS:

Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.

Number: Decimals

Step 1 Use known facts to add and subtract decimals within 1

Step 2 Complements to 1

Step 3 Add and subtract decimals across 1

Step 4 Add decimals with the same number of decimal places

Step 5 Subtract decimals with the same number of decimal places

Step 6 Add decimals with different numbers of decimal places

Step 7 Subtract decimals with different numbers of decimal places

Step 8 Efficient strategies for adding and subtracting decimals

Step 9 Decimal sequences

Step 10 Multiply by 10, 100 and 1,000

Step 11 Divide by 10, 100 and 1,000

Step 12 Multiply and divide decimals — missing values

NATIONAL CURRICULUM LINKS:

Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents.

Solve problems involving number up to 3 decimal places.

Read, write, order and compare numbers with up to 3 decimal places.

Multiply and divide whole numbers and those involving decimals by 10, 100 and 1,000.

Number: Negative numbers

Step 1 Understand negative numbers

Step 2 Count through zero in 1s

Step 3 Count through zero in multiples

Step 4 Compare and order negative numbers

Step 5 Find the difference

NATIONAL CURRICULUM LINKS:

Interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero.

Measurement: Converting units

Step 1 Kilograms and kilometres

Step 2 Millimetres and millilitres

Step 3 Convert units of length

Step 4 Convert between metric and imperial units

Step 5 Convert units of time

Step 6 Calculate with timetables

Multiply and divide whole numbers and those involving decimals by 10, 100 and 1,000.

Multiply and divide numbers mentally, drawing upon known facts.

Number: Fractions A

Step 1 Find fractions equivalent to a unit fraction

Step 2 Find fractions equivalent to a non-unit fraction

Step 3 Recognise equivalent fractions

Step 4 Convert improper fractions to mixed numbers

Step 5 Convert mixed numbers to improper fractions

Step 6 Compare fractions less than 1

Step 7 Order fractions less than 1

Step 8 Compare and order fractions greater than 1

Step 9 Add and subtract fractions with the same denominator

Step 10 Add fractions within 1

Step 11 Add fractions with total greater than 1

Step 12 Add to a mixed number

Step 13 Add two mixed numbers

Step 14 Subtract fractions

falling object.

Step 15 Subtract from a mixed number

Step 16 Subtract from a mixed number – breaking the whole

Step 17 Subtract two mixed numbers

NATIONAL CURRICULUM LINKS:

Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths.

Recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number.

Compare and order fractions whose denominators are all multiples of the same number.

Add and subtract fractions with the same denominator, and denominators that are multiples of the same number.

Forces - explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the

> Identify the effects of air resistance, water resistance and friction that act between moving surfaces. Outdoor learning Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect. DT link Scientist - Galileo Galilei

Step 1 Perimeter of rectangles

Step 2 Perimeter of rectilinear shapes

Step 3 Perimeter of polygons

Step 4 Area of rectangles

Step 5 Area of compound shapes

Step 6 Estimate area

NATIONAL CURRICULUM LINKS:

Measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres.

Calculate and compare the area of rectangles (including squares), including using standard units, square centimetres (cm2) and square metres (m2), and estimate the area of irregular shapes.

Statistics

Step 1 Draw line graphs

Step 2 Read and interpret line graphs

Step 3 Read and interpret tables

Step 4 Two-way tables

Step 5 Read and interpret timetables

NATIONAL CURRICULUM LINKS:

Solve comparison, sum and difference problems using information presented in a line graph.

Complete, read and interpret information in tables, including timetables

NATIONAL CURRICULUM LINKS:

Convert between different units of metric measure [for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre]. Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints. Solve problems involving converting between units of time.

Measurement: Volume

Step 1 Cubic centimetres

Step 2 Compare volume

Step 3 Estimate volume

Step 4 Estimate capacity

NATIONAL CURRICULUM LINKS:

Estimate volume [for example, using 1 cm3 blocks to build cuboids (including cubes)] and capacity.

Estimate volume and capacity [for example, using water].

Observing Life Cycles – describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird. (egg to duck)

> Describe the life process of reproduction in some plants and animals. Scientist - Dr.Paula Kahumbu

Animals, including humans – describe the changes as humans develop to old age. Link to PSHE learning. Continuing into Summer term.

Scientist - Louis Pasteur

Properties and changes of materials – compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets. Computing

Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution.

Geography	Earth and Space - describe the movement of the Earth, and other planets, relative to the Sun in the solar system. — outdoor learning Describe the movement of the Moon relative to the Earth. Describe the Sun, Earth and Moon as approximately spherical bodies. Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky — outdoor learning UCLAN (The Young Scientist Centre) for a Solar System workshop Scientist — Maggie Aderin-Pocock The children use the eight points of a compass, four and six figure grid references, symbols and keys to build knowledge of the UK and wider world. The children conduct a fieldwork study of Preston docks and the River Ribble, learning about trade routes linking to features of rivers. They investigate how the land has changed over time. Children identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Sothern Hemisphere, the tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night), climate zones and biomes.	Children study Greece as a European country. They locate Greece as one of the world's countries using maps, globes, atlases and digital/computer mapping. They build their place knowledge, studying a region of Greece to help them understand geographical similarities and differences.	Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating. River Amazon Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic. Demonstrate that dissolving, mixing and changes of state are reversible changes. Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda. Scientist — Becky Schroeder The children study the geography of the Amazon Basin which is the region of South America drained by the Amazon River and its tributaries. As part of this, the children learn about rivers and the water cycle including transpiration. Focus on tropical rainforest (biome), their future and other ecosystems connected to human lives and lifestyles. Identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Sothern Hemisphere, the tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night). The children build on their prior learning about the physical geography of climate zones and biomes to learn about the Amazon as an example of a specific climate zone/biome. Use the eight points of a compass, four and six figure grid references, symbols and keys to build knowledge of the UK and wider world.

DT	Mechanical and Electrical Systems and ICT (Programming) — The children research about different vehicles which care used in space, linking to their cross curricular work. They design and create a form of transport to be used in space, ensuring to include gears or pulleys in their creation.	Food- The children are tasked to design a menu or the opening ceremony of the very first Olympic Games. The children plan, design and create one component from the menu.	Structures — The children look into the structures of famous bridges, to further design and create a smaller version of a bridge structure over the Amazon river.
DT Skills	Mechanical and Electrical Systems and ICT (Computer Aided Design) To develop a technical vocabulary appropriate to the project. To use mechanical systems such as cams, pulleys and gears. To use electrical systems such as motors. To program, monitor and control products using ICT	Food To prepare mostly savoury dishes using their own selection of ingredients, taking into account their nutritional properties and sensory characteristics. To weigh and measure using scales. To know where and how ingredients are grown and processed To join and combine a widening range of ingredients.	Structures To use the correct terminology for tools materials and processes. To use bradawl to mark hole positions. To use hand drill to drill tight and loose fit holes. To cut strip wood, dowel, square section wood accurately to 1mm. To join materials using appropriate methods. To build frameworks to support mechanisms. To stiffen and reinforce complex structures
DT Key Vocabulary	pulley, drive belt, gear, rotation, spindle, driver, follower, axle, motor, circuit, switch, circuit diagram, annotated drawings, exploded diagrams, mechanical system, electrical system, input, process, output	ingredients, yeast, dough, bran, flour, wholemeal, baking soda, spice, herbs fat, sugar, carbohydrate, protein, vitamins, nutrients, nutrition, healthy, varied, gluten, dairy, allergy, intolerance, savoury, source, seasonality utensils, combine, fold, knead, stir, pour, mix, rubbing in, whisk, beat, roll out, shape, sprinkle, crumble	frame structure, stiffen, strengthen, reinforce, triangulation, stability, shape, join, temporary, permanent

Mu Hannu Mind	ongoing in oughout the gour	MEET THE BRAIN	CELEBRATE	APPRECIATE	RELATE	ENGAGE
My Happy Mind		The difference between our brain and mind. More detail about each part of the brain and why they work the way they do. How we can train their brains in times of stress by using Happy Breathing when our Amygdala gets triggered. How others react differently to us and that we all have different triggers that cause us to Fight, Flight or Freeze. How to more intentionally look after our brains to keep them healthy. The hormones in our brain and how we can manage them, including Dopamine and Cortisol. Vocab: Brain, Cells, Hippocampus, Amygdala, Prefrontal Cortex, Mind, Focus, Neuroplasticity, Neuron, Neural Pathway, Happy Breathing, 'Fight, Flight, Freeze', Oxygen, Real Danger, Perceived Danger, Trigger, Cortisol	How the 24 Character Strengths are organised into 6 key Virtues: Wisdom, Courage, Humanity, Justice, Temperance, and Transcendence. That Strengths Spotting shows children how strengths can be used in different ways. That we still have all 24 Character Strengths but, when we use our Top 5, Team H-A-P feels at its best. How we can move our strengths around and grow strengths by practising them through Neuroplasticity. That when we stop and reflect on using our strengths, our Hippocampus will store it as a memory. We will learn that when faced with a similar situation, we can remember how that strength can help. How Strengths Spotting can help Team H-A-P feel happy as when we use our strengths, Dopamine gets released, and we feel confident. We will also learn that using our strengths can help us manage our Cortisol levels. Vocab: Wisdom, Courage, Humanity, Justice, Temperance, Transcendence, Virtues, Strengths Spotting, Top Strengths, Neuroplasticity, Team H-A-P, Dopamine, Habits, Neural Pathways, Cortisol	What appreciation means and think of ways to show appreciation to others. What we should focus on when thinking about gratitude. We will explore 3 questions to help us develop deeper levels of gratitude. Why it is important to tell others that we're grateful for them and how it makes others feel good when we create a Gratitude Domino Effect. How gratitude helps our bodies stay calm and releases Dopamine. This then helps to keep Team H-A -P happy and the Amygdala calm. That when we regularly give and receive gratitude, Dopamine will continuously be released, and even thinking about experiences or people we are grateful for releases Dopamine. That the more we think about gratitude, the stronger the Neural Pathways get and the easier it becomes. That an Attitude of Gratitude helps us to see all things we are grateful for and makes the problems we face a little easier. That often the hardest category to think about gratitude for is ourselves. Vocab: Appreciate, Grateful, Thankful, Wheel of Gratitude, Ourselves, Others, Experiences, Team H-A-P, Happy Breathing, Dopamine Attitude of Gratitude	What our Top 5 Strengths are and which Virtue they fall under. That when we see things from different perspectives, we are using their Prefrontal Cortex and then our brain can remember this and store it in their Hippocampus. That we can train our brain to notice how people use their strengths differently. That strengths help release Dopamine and make Team H-A -P happy, calm and relaxed. That you are more likely to see different strengths and perspectives positively when Team H-A -P is working as a team. We can do Happy Breathing to stay calm when facing challenging situations and see other people's perspectives. That friends can help solve problems, and it is important to show gratitude towards them. This can help develop an Attitude of Gratitude, and the Gratitude Domino Effect makes everyone feel good. Skills needed to listen actively and how this will help them to 'Stop, Understand and Consider'. They will understand why this is so important in friendships	How to set goals linked to transition, which we can work toward to help us feel more comfortable with what is ahead. How to recognise our concerns and define strategies to overcome them. How we can use our strengths to leverage the opportunities that we are excited about. How to create goals around leveraging and practising the tools we have learned as we progress through to the next year of school. Vocab: Engage, Activity, Goal, Perseverance, 'Feel Good, Do Good', Believe to Achieve, Happy Breathing, Habits, Perseverance, Resilience, Dopamine, Cortisol, Team Goals

In all games activities, pupils have to think about how they use skills, strategies and tactics to outwit the opposition. In netball pupils do this by maintaining possession and moving the ball towards goal to score. Pupils develop their understanding of the importance of fair play and honesty while self-managing games and learning and abiding by key rules, as well as evaluating their own and others' performances.

National Curriculum link:

Use running, jumping, throwing and catching in isolation and in combination. Play competitive games, modified where appropriate and apply basic principles suitable for attacking and defending. Develop flexibility, strength, technique, control and balance.

Physical skills:

Throw, catch, change direction, change speed, shoot.

Social skills:

Communication, collaboration, respect.

Emotional skills:

Honesty and fair play, pride, empathise, persevere.

Thinking skills:

Select and apply, decision making, comprehension.

South Ribble Coach -Mindfulness Coaching

to select and apply tactics to the game to outwit their opponent. In dodgeball, pupils achieve this by hitting opponents with a ball whilst avoiding being hit. Pupils are given opportunities to play games independently and are taught the importance of being honest whilst playing to the rules. Pupils are given opportunities to evaluate and suggest improvements to their own and others' performances

National Curriculum link:

Use running, jumping, throwing and catching in isolation and in combination. Play competitive games, modified where appropriate and apply basic principles suitable for attacking and defending.

Physical skills:

Throw, catch, dodge, block.

Social skills:

Collaboration, respect, leadership, communication.

Emotional skills:

Honesty, determination, confidence.

Thinking skills:

Make decisions, select and apply tactics.

<u>Gymnastics</u>

In this unit pupils develop balancing, rolling, jumping and inverted movements. They explore partner relationships such as canon and

about how they use skills, strategies and tactics to outwit the opposition. In football pupils do this by maintaining possession and moving the ball towards goal to score. Pupils develop their understanding of the importance of fair play and honesty while self-managing games and learning and abiding by key rules, as well as evaluating their own and others' performances.

activities, pupils have to think

National Curriculum link:

Use running, jumping, throwing and catching in isolation and in combination. Play competitive games, modified where appropriate and apply basic principles suitable for attacking and defending.

Physical skills:

Dribble, pass, receive, track, tackle.

Social skills:

Communication, respect, collaboration, co-operation.

Emotional skills:

Honesty, persevere, determination.

Thinking skills:

Assess, explore, decision making, select and apply.

OAA

In this unit pupils develop a skill set that is transferrable to OAA (outdoor adventurous activities). Pupils work individually, collaboratively in pairs and

whole, pupils think about how to use movement to explore and communicate ideas and issues. and their own feelings and thoughts. As they work, they develop an awareness of the historical and cultural origins of different dances. Pupils will be provided with the opportunity to create and perform their work. They will be asked to provide feedback using the correct dance terminology and will be able to use this feedback to improve their work. Pupils will work safely with each other and show respect towards others.

National Curriculum link:

Perform dances using a range of movement patterns.

Physical skills:

Actions, dynamics, space, relationships.

Social skills:

Collaboration, consideration and awareness of others, inclusion, respect, leadership.

Emotional skills:

Empathy, confidence, perseverance.

Thinking skills:

Creativity, observe and provide feedback, use feedback to improve, comprehension, select and apply skills.

Handball

In this unit pupils develop their understanding of the attacking and defending principles of invasion games. In all games activities, pupils have to think about how they use skills, strategies and tactics to outwit

In all games activities, pupils have to think about how they use skills, strategies and tactics to outwit the opposition. In tag rugby pupils do this by maintaining possession and moving the ball towards the try line to score. Pupils develop their understanding of the importance of fair play and honesty while self-managing games and learning and abiding by key rules, as well as evaluating their own and others' performances.

National Curriculum link:

Use running, jumping, throwing and catching in isolation and in combination. Play competitive games, modified where appropriate and apply basic principles suitable for attacking and defending.

Physical skills:

Throw, catch, run, change direction, change speed. Social skills:

Communication, support

others, collaboration. Emotional skills: Honesty and fair play,

confidence, determination,

trust. Thinking skills:

Decision making, comprehension, reflection, identify strengths and areas for development.

Athletics

In this unit, pupils are set

their knowledge of the different roles of bowler, wicket keeper, fielder and batter. In all games activities, pupils have to think about how they use skills, strategies and tactics to outwit the opposition. In cricket, pupils achieve this by striking a ball and trying to avoid fielders, so that they can run between wickets to score runs. Pupils are given opportunities to work in collaboration with others, play fairly demonstrating an understanding of the rules, as well as being respectful of the people they play with and against.

National Curriculum link:

Use running, jumping, throwing and catching in isolation and in combination. Play competitive games, modified where appropriate and apply basic principles suitable for attacking and defending.

Physical skills:

Deep and close catch. underarm and overarm throw, overarm bowl, long and short barrier, batting.

Social skills:

Collaboration. communication, respect. Emotional skills:

Honesty, perseverance.

Thinking skills:

Observation, provide feedback, select and apply skills, tactics, assessing.

South Ribble Coach — Young Leaders Training Session synchronisation and matching and mirroring. Pupils are given opportunities to receive and provide feedback in order to make improvements on their performances. In gymnastics as a whole, pupils develop performance skills considering the quality and control of their actions.

National Curriculum link:

Develop flexibility, strength, technique, control and balance.

Physical skills:

Symmetrical and asymmetrical balances, rotation jumps, straight roll, forward roll, straddle roll, backward roll, cartwheel, bridge, shoulder stand.

Social skills:

Work safely, support others, collaboration.

Emotional skills:

Confidence, perseverance, resilience, determination.

Thinking skills:

Observe and provide feedback, creativity, reflection select and apply actions, evaluate and improve sequences.

groups to solve problems and are encouraged to be inclusive of others, share ideas to create strategies and plans to produce the best solution to a challenge. Pupils are also given the opportunity to lead groups and utilise negotiation skills. Pupils develop map reading skills including the use of cardinal points, scale and direction to create, plan and follow routes across a course.

National Curriculum link:

Take part in outdoor and adventurous activity challenges both individually and within a team.

Physical skills:

Balance, co-ordination, run at speed, run over distance.

Social skills:

Negotiation, communication, leadership, work safely.

Emotional skills:

Empathy, confidence, resilience. **Thinking skills:**

Problem solving, reflect, critical thinking, select and apply, comprehension.

the opposition. In handball pupils do this by maintaining possession and moving the ball towards goal to score. Pupils develop their understanding of the importance of fair play and honesty while self-managing games and learning and abiding by key rules, as well as evaluating their own and others' performances.

National Curriculum link:

Use running, jumping, throwing and catching in isolation and in combination. Play competitive games, modified where appropriate and apply basic principles suitable for attacking and defending.

Physical skills:

Throw, catch, run, dribble, shoot, change direction, change speed.

Social skills:

Communication, kindness, respect, collaboration.

Emotional skills:

Confidence, honesty and fair play, determination, perseverance.

Thinking skills:

Select and apply, decision making, problem solving, comprehension, reflection.

South Ribble Coach — Dance Coaching

challenges for distance and time that involve using different styles and combinations of running, jumping and throwing. As in all athletic activities, pupils think about how to achieve their greatest possible speed, height, distance or accuracy and learn how to persevere to achieve their personal best. They learn how to improve by identifying areas of strength as well as areas to develop. Pupils are also given opportunities to lead when officiating as well as observe and provide feedback to others. In this unit pupils learn the following athletic activities: long distance running, sprinting, relay, triple jump, shot put and javelin.

National Curriculum link:

Use running, jumping and throwing in isolation and in combination. Develop flexibility, strength, technique, control and balance.

Physical skills:

Pace, sprint, relay changeovers, jump for distance, push throw, pull throw.

Social skills:

Collaboration, negotiation, communication, supporting others.

Emotional skills:

Perseverance, confidence, concentration, determination.

Badminton

In this unit pupils develop their understanding of the principles of net and wall games. In all games activities, pupils have to think about how they use skills, strategies and tactics to outwit the opposition. In badminton, they do this by placing an object away from an opponent to make it difficult for them to return. Pupils are given opportunities to work in collaboration with others, play fairly demonstrating an understanding of the rules, as well as being respectful of the people they play with and against.

National Curriculum link:

Use running, jumping, throwing and catching in isolation and in combination. Play competitive games, modified where appropriate and apply basic principles suitable for attacking and defending.

Physical skills:

Underarm clear, overarm clear, serving, rallying.

Social skills:

Collaboration, communication, respect,

encouragement. Emotional skills:

Perseverance, patience, honesty.

Thinking skills:

Using tactics and rules, decision making, select and apply, identifying areas of

strength and areas for
development, reflection.
